Anthony Giddens Modernity And Self

Giddens ' Modernity and Self Identity - in 14 bullet points. A brief post covering the relationship between self and society in late-modernity according to Anthony Giddens, covering concepts such as Globalisation, abstract systems, ontological security, manufactured risks, narcissism and fundamentalism. This is very much my own reading of Giddens ' text - Modernity and Self-Identity: Self and Society in the Late Modern Age.

Giddens ' Modernity and Self Identity - in 14 bullet points ...

'In this book Anthony Giddens brings back in personality, the psyche, human nature itself. It is a pleasure and a real intellectual advance to have a social theorist of his stature revive the once central but long ignored study of personality and culture, character and society, especially a theorist with his very precise sense of what is truly modern in contemporary life.'

Modernity and Self-identity: Self and Society in the Late ...

Modernity and Self-identity: Self and Society in the Late Modern Age by Anthony Giddens (1991-07-11) Paperback - 1 Jan. 1779 by Anthony Giddens (Author)

Modernity and Self-identity: Self and Society in the Late ...

Self-identity, history, modernity. Drawing on a therapeutic text - ' Self-Therapy ' by Janette Rainwater - Giddens selects ten features which are distinctive about the search for self-identity in the late modern age: The self is seen as a reflexive project for which the individual is responsible. Self-understanding is relegated to the more inclusive and fundamental aim of rebuilding a more rewarding sense of identity.

Giddens - Modernity and Self-Identity - ReviseSociology

This major study develops a new account of modernity and its relation to the self. Building upon the ideas set out in The Consequences of Modernity, Giddens argues that 'high' or 'late' modernity is a post traditional order characterised by a developed institutional reflexivity. Seller Inventory # B9780745609324.

Modernity and Self Identity by Anthony Giddens - AbeBooks

In this book, Anthony Giddens offers a very detailed and comprehensive analysis of the existential problems concerning every individual is facing in this late modern age in forging an identity for the self-project. This is by no means an easy task given the confusions of choice we are all confronted with now.

Modernity and Self-Identity: Self and Society in the Late ...

From Anthony Giddens, *Modernity and Self-Identity: Self and Society in the Late Modern Age*, Stanford, CA: Stanford University Press, 1991, pp. 187-201. 'Living in the world': dilemmas of the self. In conditions of late modernity, we live 'in the world' in a different sense from previous eras of history. Everyone still continues to live a local life, and the constraints of the body ensure that all individuals, at every moment, are contextually situated in time and space.

From Anthony Giddens, *Modernity and Self-Identity: Self ...*

Building on the ideas set out in the author's *The Consequences of Modernity*, this book focuses on the self and the emergence of new mechanisms of self-identity that are shaped by yet also shape the institutions of modernity. The author argues that the self is not a passive entity, determined by external influences. Rather, in forging their self-identities, no matter how local their contexts of action, individuals contribute to and directly promote social influences that are global in their ...

Modernity and Self-identity: Self and Society in the Late ...

Anthony Giddens, Baron Giddens (born 18 January 1938) is an English sociologist who is known for his theory of structuration and his holistic view of modern societies. He is considered to be one of the most prominent modern sociologists and the author of at least 34 books, published in at least 29 languages, issuing on average more than one book every year.

Anthony Giddens - Wikipedia

Giddens is among those who have resisted the equations of modernity with liberalism, or modernity with capitalism. Giddens draws heavily from Marx and takes his own position in defining modernity. Modernity, according to him, is multi-dimensional. It is his emphasis, which distinguishes him from other sociologists.

The theme of self-identity and the concepts of the reflexive self, trust, risk, expert systems and claims of truth, offer a way to interrogate the field of modern healthcare.

Anthony Giddens: The Reflexive Self and the Consumption of ...

Modernity and Self-Identity deals more with theories of the self and microsociological issues in the contemporary world. During the last decade, Giddens has sometimes been an advisor to the British Labour Party and is closely connected with Tony Blair, the British Prime Minister.

This major study develops a new account of modernity and its relation to the self. Building upon the ideas set out in *The Consequences of Modernity*, Giddens argues that 'high' or 'late' modernity is a post traditional order characterised by a developed institutional reflexivity. In the current period, the globalising tendencies of modern institutions are accompanied by a transformation of day-to-day social life having profound implications for personal activities. The self becomes a 'reflexive project', sustained through a revisable narrative of self identity. The reflexive project of the self, the author seeks to show, is a form of control or mastery which parallels the overall orientation of modern institutions towards 'colonising the future'. Yet it also helps promote tendencies which place that orientation radically in question - and which provide the substance of a new political agenda for late modernity. In this book Giddens concerns himself with themes he has often been accused of unduly neglecting, including especially the psychology of self and self-identity. The volumes are a decisive step in the development of his thinking, and will be essential reading for students and professionals in the areas of social and political theory, sociology, human geography and social psychology.

Om den enkeltes rolle i dagens højt tekniske, bureaukratiske samfund

In this major theoretical statement, the author offers a new and provocative interpretation of the institutional transformations associated with modernity. We do not as yet, he argues, live in a post-modern world. Rather the distinctive characteristics of our major social institutions in the closing period of the twentieth century express the emergence of a period of 'high modernity,' in which prior trends are radicalised rather than undermined. A post-modern social universe may eventually come into being, but this as yet lies 'on the other side' of the forms of social and cultural organization which currently dominate world history. In developing an account of the nature of modernity, Giddens concentrates upon analyzing the intersections between trust and risk, and security and danger, in the modern world. Both the trust mechanisms associated with modernity and the distinctive 'risk profile' it produces, he argues, are distinctively different from those characteristic of pre-modern social orders. This book builds upon the author's previous theoretical writings, and will be of fundamental interest to anyone concerned with Giddens' overall project. However, the work covers issues which the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern. This book will be essential reading for second year undergraduates and above in sociology, politics, philosophy, and cultural studies.

This is the first anthology to thematize the dramatic upward and downward shifts that have created the new social theory, and to present this new and exciting body of work in a thoroughly trans-disciplinary manner. In this revised second edition readers are provided with a much greater range of thinkers and perspectives, including new sections on such issues as imperialism, power, civilization clash, health and performance. The first section sets out the main schools of contemporary thought, from Habermas and Honneth on new critical theory, to Jameson and Hall on cultural studies, and Foucault and Bourdieu on poststructuralism. The sections that follow trace theory debates as they become more issues-based and engaged. They are: the post-foundational debates over morality, justice and epistemological truth the social meaning of nationalism, multiculturalism and globalization identity debates around gender, sexuality, race, the self and post-coloniality. This new edition provides more ample biographical and intellectual introductions to each thinker, and substantial introductions to each of the major sections. The editors introduce the volume with a newly revised, interpretive overview of social theory today. *The New Social Theory Reader* is an essential, reliable guide to current theoretical debates.

In this major theoretical statement, the author offers a new and provocative interpretation of institutional transformations associated with modernity. What is modernity? The author suggests, "As a first approximation, let us simply say the following: 'modernity' refers to modes of social life or organization which emerged in Europe from about the seventeenth century onwards and which subsequently became more or less worldwide in their influence." We do not as yet, the author argues, live in a post-modern world. The distinctive characteristics of our major social institutions in the closing years of the twentieth century suggest that, rather than entering into a period of post-modernity, we are moving into a period of "high modernity" in which the consequences of modernity are becoming more radicalized and universalized than before. A post-modern social universe may eventually come into being, but this as yet lies on the other side of the forms of social and cultural organization that currently dominate world history. In developing a fresh characterization of the nature of modernity, the author concentrates on the themes of security versus danger and of trust versus risk. Modernity is a double-edged phenomenon. The development of modern social institutions has created vastly greater opportunities for human beings to enjoy a secure and rewarding existence than in any type of pre-modern system. But modernity also has a somber side that has become very important in the present century, such as the frequently degrading nature of modern industrial work, the growth of totalitarianism, the threat of environmental destruction, and the alarming development of military power and weaponry. The book builds upon the author's previous theoretical writings and will be of great interest to those who have followed his work through the years. However, this book covers issues the author has not previously analyzed and extends the scope of his work into areas of pressing practical concern.

Anthony Giddens is widely recognized as one of the most important sociologists of the post-war period. This is the first full-length work to examine Giddens' social theory. It guides the reader through Giddens' early attempt to overcome the duality of structure and agency. He saw this duality as a major failing of social theories of modernity. His attempt to resolve the problem can be regarded as the key to the development of his landmark 'structuration theory'. The book is the most complete and thorough assessment of Giddens' work currently available. It incorporates insights from many different perspectives into his theory of structuration, his work on the formation of cultural identities and the fate of the nation-state. This far-reaching work also touches on issues such as the transformation of modern intimacy and sexuality, and the fate of politics in late modern society.

'Before the current global era it is impossible to imagine that comparable events [like September 11] could have occurred, reflecting as they do our new-found interdependence. The rise of global terrorism, like world-wide networks involving in money-laundering, drug-running and other forums of organised crime, are all parts of the dark side of globalisation.' From the new Preface This book is based on the highly influential BBC Reith lecture series on globalisation delivered in 1999 by Anthony Giddens. Now updated with a new chapter addressing the post-September 11th global landscape, this book remains the intellectual benchmark on how globalisation is reshaping our lives. The changes are explored in five main chapters: * Globalisation * Risk * Tradition * Family * Democracy.

How should one understand the nature and possibilities of political radicalism today? The political radical is normally thought of as someone who stands on the left, opposing backward-looking conservatism. In the present day, however, the left has turned defensive, while the right has become radical, advocating the free play of market forces no matter what obstacles of tradition or custom stand in their way. What explains such a curious twist of perspective? In answering this question Giddens develops a new framework for radical politics, drawing freely on what he calls "philosophic conservatism", but applying this outlook in the service of values normally associated with the Left. The ecological crisis is at the core of this analysis, but is understood by Giddens in an unconventional way - as a response to a world in which modernity has run up against its limits as a social and moral order. The end of nature, as an entity existing independently of human intervention, and the end of tradition, combined with the impact of globalization, are the forces which now have to be confronted, made use of and coped with. This book provides a powerful interpretation of the rise of fundamentalism, of democracy, the persistence of gender divisions and the question of a normative political theory of violence. It will be essential reading for anyone seeking a novel approach to the political challenges which we face at the turn of the twenty-first century.
