The global airline industry, facing significant changes and discontinuity is prompted and forced to deal with a "new

Download File PDF Business

normal." Who would have imagined a few years ago that: - a significant percentage of consumers in the US now prefer to fly low-cost airlines instead of full-service airlines because they perceive the product to

Download File PDF Business

be better, -
airlines would
generate up to a
third of their
total income
from non-ticket
revenue, - many
low-cost
airlines would
add complexity
to their
original simple
business models
through the

Download File PDF Business

development of code-share agreements, the use of global distribution systems, and travel agents to distribute their seats, - Jetstar, a low-cost subsidiary of Qantas, would grow faster and be more

Download File PDF Business

profitable than its parent, - a survey carried out by Ryanair would show that 42 percent of passengers would be willing to stand on short (one hour) flights if they could pay 50 percent less than seated

Download File PDF Business

passengers, -
passengers could
pay as little as
US\$2,000 for a
transatlantic
Business Class
ticket on top-
brand airlines,
- Lufthansa
would have
ownership in
airlines based
in Austria,
Belgium, Italy,

Switzerland,
Turkey, the UK,
and the US, and
that it would
continue to
pursue equity
ownership in
airlines based
in Poland and
Scandinavia, or
- the Japanese
and Canadian
governments
would struggle

to find
different ways
to bail out
their heretofore
flag carriers?
To deal with
this upcoming

airlines have to
go beyond their
