CCNA Discovery 1, Chapter 5. 5.3.2:
You can manually enter the IP address
on a host, or a host can dynamically
acquire the address through DHCP.

Bookmark File PDF Ccna Discovery 1 Chapter 5

Typically, a DHCP client requests addressing information from a DHCP server on a network. A PC acts as a DHCP client for an integrated services router (ISR), and the ISR can act as a DHCP client for the ISP.

CCNA Discovery 1, Chapter 5. 5.3.1:
Static address assignment on a host
guarantees that it will always have the
same IP address on the network.
Hosts that provide services such as
servers and printers usually receive
static IP addresses. However, large
networks typically add and remove
hosts for various purposes, so DHCP
provides a manageable way to
maintain the addressing scheme.

CCNA 1 v5 Introduction to Networks : Introduces the architecture, structure, functions, components, and models of the Internet and computer networks. The principles of IP addressing and fundamentals of Ethernet concepts, media, and operations are introduced to provide a foundation for the curriculum. By the end of the course, students will be able to build simple LANs, perform basic configurations for routers and switches, and implement IP addressing schemes.
