Mentoring is very much more than simple one-to-one informal instruction, or what used to be called 'coaching'. Modern mentoring techniques are modelled on those of executive coaching as well as expert academic tutoring. Mentoring is simple but not necessarily easy. An estimated 40% of all mentoring schemes fail through lack of mentor training and understanding. No great effort is required to study the literature but, for mentoring to be effective, adherence to basic principles and exercising specific skills is absolutely necessary. The book provides an introduction to what we mean by mentoring and its basic

skills – skilful questioning, active listening, building trust, self-management and giving advice and feedback. It further covers mentoring principles, how to conduct mentoring sessions and a wide range of practical applications. The final chapter gives the outlines and principles for creating a basic mentoring scheme within an organisational context. This book is written for those practitioners in science, technology, engineering and mathematics, the STEM fields, who have been pitched into the role of mentor without any prior training. Its objective is to alleviate anxiety, frustration and stress caused by not knowing exactly what is expected. In offering an introduction to mentoring it gives practical guidance as a quick and easy read.

Increasingly the public sector is facing a range of unique and complex challenges. As a result, human resource management is vital in changing organizations, engaging people, and in assisting in the implementation of strategies and objectives. Strategic Human Resource Management in the Public Arena focuses on the specific challenges of the public and non-profit sectors. It takes a managerial approach, focusing on how HR practices and processes can be aligned with an organization's strategic objectives, with each chapter structured around implementing or designing an HR process for an organization's unique setting and strategic priorities. Key features:

- Puts the reader in the role of a manager.
- Recognizes the unique perspective of public sector organizations and the growing research and theory on public sector organizations.
- Includes a wealth of practice-based, problem-solving activities.
