Excel 2000 Bis 2010 making 10, so there is an economy of scale here with larger documents and problems, and that is where VBA can really shine and save you time. Macros and the Visual Basic Editor

Getting started with VBA in Office | Microsoft Docs

The custom format to show number in thousand or in million is simple:
#,##0,"k". #,##0,,"M". The "k" or "M" is optional, depend on whether you want to show it in the header or in the figure itself. The trick is to put 1 comma and 2 comma at the end of the format setting (#,##0) for "thousand" and "million"

Format truncates format to
257 characters.. If you try
to format a number without
specifying format, Format
provides functionality
similar to the Str function,

Download Free Excel Vba Mit Ber 1000 Makros F R

although it is 2010

internationally aware.

However, positive numbers formatted as strings using Format don't include a leading space reserved for the sign of the value; those converted using Str retain the leading space.

Format function (Visual Basic for Applications ...
