Investigates and questions the scientific consensus on the origins of civilization Do we, the human species, really know who we are or where we came from or how we originated or our place in the cosmos? Or is much of what we have been taught wrong or misguided or possibly even blatant lies intended to keep people in power and everyone else in line? Exploring alternative theories on the establishment of society and civilization, Hidden History: Ancient Aliens and the Suppressed Origins of Civilization looks at a variety of dissenting, suppressed, and forbidden accounts of history and the origins of humanity. It takes a broad and inclusive survey of historical documents, various theories, and a wide array of perspectives to explore what conventional wisdom might have gotten right and wrong. The book serves as a useful introduction into the suppressed accounts of the origins of modern civilization. It combines cutting-edge science with metaphysical, spiritual, and even paranormal views, daring to ask whether there might be a better explanation for humanity's existence and the origins of civilization than the current scientific consensus. Hidden History looks at the multiverse and parallel dimensions, the ancient alien theory, metaphysics, and hypotheses beyond physical perception, the eleven dimensions of string theory, radio telescopes that penetrate to the event horizon of our universe, mathematical equations that take us where no one has gone before, and the world-wide sharing of experiences old and new that speak of long forgotten ancient mythologies that reveal historical truths. With more than 120 photos and graphics, this tome is richly illustrated. Its helpful bibliography provides sources for further exploration, and an extensive index adds to its usefulness. This fascinating book is a thorough investigation and examination of the mysteries surrounding early civilizations, their myths, legends, histories, monuments—and lasting legacies.

reviewing the scientific evidence, this fascinating book ties together historical events in one part of the world that produced actual effects in others. Uncovering hidden and suppressed pasts of technologically and culturally advanced ancient civilizations, it looks at how modern civilization compares and contrasts to those who have gone before. It will leave you with the sense that what has happened to past advanced civilizations might very well be happening again in our own time! With more than 120 photos and graphics, it is richly illustrated. Its helpful bibliography and extensive index add to its usefulness.

An increasing number of historical and archaeological finds made around the world have been classified as out-of-place artifacts (ooparts). They have been called this because they appear unexpectedly among the ruins of the past with no evidence of a preceding period of development; their technological sophistication seems far beyond the capabilities of ancient peoples. Drawing on the literature and art of the Chaldeans, Sumerians, Babylonians and others, Rene Noorbergen's contention is that a superior race of man was responsible for these scientific marvels that bear testimony to a civilization with technology comparable to our own.
