Hydroponics Produces Higher Yields
Faster. Hydroponics can produce
many times the yield of soil-grown
plants over the same period of time.

Their roots do not have to push
through the soil to compete for
nutrients. Instead, a hydroponic
system distributes nutrients evenly to
each plant. There is always enough
water for the plant.

Hydroponics Gardening Tips,
Techniques - a Full Guide ...

The term hydroponics derives from the Greek words for water (hydro) and work (ponos) - "working with water". In a hydroponic system plant roots do not grow in soil, but in nutrient-enriched water. Compared to the cultivation in soil, the plants get everything they need to grow through the nutrient solution, delivered directly to the roots.

system, you 'll likely be thinking about what plants you might grow once your hydroponic garden is up and running. In this section, we 'll look at some of the best plants for beginners in hydroponics as well as exploring their growing time, ideal pH levels and what varieties of these plants exist.

Beginner's Guide to Hydroponics -
myjobquote.co.uk

Hydroponic gardening is a method for growing plants without soil. Plants grown hydroponically do not sit in soil but rather in a growing medium that transfers water and a nutrient solution to the plant roots. Most hydroponics systems are housed indoors, where the grower can control all elements of the plants ' life cycles.
