The mechanical engineering curriculum in most universities includes at least one elective course on the subject of reciprocating piston engines. The majority of these courses today emphasize the application of thermodynamics to engine efficiency,

performance, combustion, and emissions. There are several very good textbooks that support education in these aspects of engine development.

However, in most companies engaged in engine development there are far more engineers working in

University studies  
should include  
opportunities that  
prepare engineers  
desiring to work in  
these aspects of  
engine development  
as well. My  
colleagues and I have  
undertaken the

engine design and  
mechanical  
development. It is of  
necessity an  
overview. Its focus is  
limited to  
reciprocating-piston  
internal-combustion  
engines – both diesel  
and spa- ignition  
engines. Emphasis is
