Those two books govern, for good or for bad, the lives and deaths of millions. And as for the Origin of the Species, well, all I need to say is that evolution is the foundation of modern Biology. Taking evolution out of biology undermines everything, from the classification system on down. That, to me, is a pretty influential book.

It is a narrative device for putting meaning into the flux of historical process - creating protagonists, heroes, pace, and plot. For this reason, the division of history into periods always carries an ideological load, and it is a methodological imperative to approach questions of broad historical periodization with this in mind.]
